

Infection Control Keyboard and Mouse

"Kleen Keys" brand is your assurance of quality and reliability.

Important Facts:

One person dies every six minutes from Hospital Acquired Infections.

MRSA is now widespread in many hospitals and is one of the leading causes of nosocomial pneumonia and surgical site infections and the second leading cause of hospital acquired blood stream infections.

Antibiotic-resistant organisms are usually spread on the hands of healthcare providers or equipment used in healthcare facilities.

Studies have shown that proper handwashing by healthcare workers is moderately practised with the least compliance noted among doctors.

Once contaminated, MRSA and VRE can live up to 24 hours on your keyboard and mouse which are a haven for deadly bacteria.

Over 50% of all keyboards test positive for urine and have 67% more germs per square inch than a toilet seat.

"The one piece construction means there are few hiding places for the microbes that cause infections - that also makes it very easy to clean. This is a great 'infection control'-friendly keyboard, and is quite nice to use!"

John Vandyke, Vice President of Professional and Technical Services at Virox Technologies Inc.

Important Benefits of Kleen Keys:

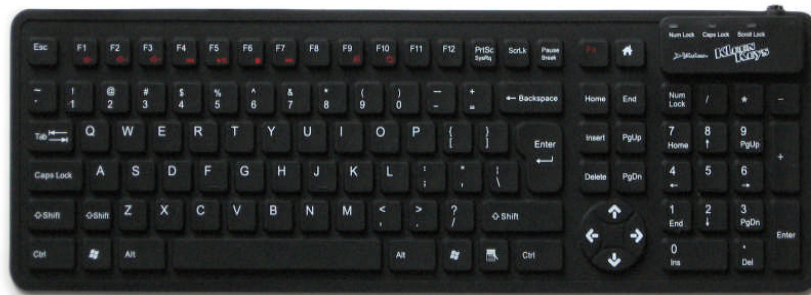

"Kleen Keys" keyboards were tested by Virox Technologies Inc., Developer of patented AHP products which are environmentally safe hydrogen based disinfectants, used successfully during the SARS crisis.

Medical Cleaning Protocol in accordance with medically accepted, evidence based practices developed by Virox Technologies Inc.

Can be safely & easily cleaned to eliminate antibiotic-resistant strains of bacteria such as MRSA and VRE. Can be cleaned, providing a definite cost benefit over replacing dirty worn keyboards.

Ergonomical flat design reduces injuries from negative angle stress to the wrist.

Guaranteed not to crack or dry out. One year limited replacement warranty.

Technical Specifications

Features/Benefits:

- Sealed 100% silicone design for dust-free, contaminant-free and water-resistant use
- Cleans with soap and water, alcohol or AHP products
- No moving parts to minimize failures
- Excellent tactile feedback similar to standard keyboard
- Easy to install
- Full size keyboard
- USB & PS/2
- Flat design to reduce negative stress to the wrist
- One Year Replacement Warranty
- Latex Free

Specifications:

- ◆ Size: 400 (L) x 130 (W) x 8 (H) mm
- ◆ Weight: 180g Cable Length: Approximately 1.80m
- ◆ Storage Temperature: -20° to 70°C
- ◆ Operating Temperature: -0° to 70°C
- ◆ Power Consumption: 26mA Resistance: IP 65(protected against water-jet streams) and IP 67(protected against intermittent submersion in water)
- ◆ Layout: Includes numeric keypad and 12 Function keys.
- ◆ Compliance: CE, FCC
